Choosing a preset In the new image tool that Photoshop offers, you're introduced to a slider that enables you to choose a preset. There's a model of a model photo in Figure 2-1 and you see the new Enhance Lighting tab.") (refer to Figure 2-1). You can choose from a number of presets that give you different options for improving your image. You can choose a soft light, medium light, or a high key light for your image, for example. Q: How can I use the capability of a task to wait for an async operation?

I have an async Task that builds a string and prints it in the task Completed event. I want to use that task to perform an await an operation that also has an event. I have seen the AsyncContext.Run to use that operation asynchronously. But how can I use the capability of the Task to perform an await? I was thinking about something like this (pseudo):

```
public async Task Build(string input) { var result = ""; var t = Build(input); while(t.Completed.IsCompleted == false) await t.ContinueWith(t => result = t.Result); return result; }
```

A: The solution that works best for me is to create a TaskCompletionSource instead of a Task. Then, you can wrap each task into another task (a WaitingTask) and use the task completion source:

```
public async Task Build(string input) { var tcs = new TaskCompletionSource(); var result = string.Empty; var t = Build(input); tcs.SetResult(t.Result); t.ContinueWith(async (t) => await tcs.Task); return await tcs.Task; }
```

```
public async Task Build(string input) { var result = ""; var t = Build(input); t.ContinueWith(t => result = t.Result); return result; }
```

It's possible that the debugger shows that t.Result does not depend on the task when you set result = t.Result. If that is the case, then the first version should work.

A: You can use ContinueWith overload that allows you to pass in a lambda that will be executed. It's pretty straight forward:

```
public async Task Build(string input) { var result = ""; var t = Build(input); t.ContinueWith(t => result = t.Result); return
```

What's New In?

Bozhidar Avramov Bozhidar Avramov () (3 June 1911 – 22 January 1941) was a Bulgarian Communist militant and a People's Hero of

Bulgaria. Avramov was born in the village of Krasno Selo in the municipality of Kazanlak. He was a miner and a member of the KUCB when he joined the underground party. He was arrested on 15 May 1937, and was sentenced to death and executed on 22 January 1941. His body was left hanging on the main entrance of the Sofia courthouse. On 14 March 2019 the Bulgarian Communist Party became the first party of the European Union in the Golden Gallows List, which was raised by Popular Front for Democracy – Bulgarian People's Union (BSP) which was a political alliance of the Bulgarian Communist Party and of the Bulgarian Agrarian People's Union. In accordance with the political program of the BSP the Golden Gallows List includes the names of persons who committed crimes against humanity, and only the crimes that were committed after the resignation of the BCP and the BAPU from BCP. Today, you can buy beer in nearly any bottle you want, but back in the early days, you had only two choices: a tall, skinny bottle and a short, fat one. Some bartenders back then would carefully mix different beers together and use the funky flavor combinations as a new drink. They would sometimes use more than one type of beer in the same drink. To be fair, there was not much around back then that could compare to the awesome selection we have today, so it was fun experimenting with the combinations. Here is a quick video tutorial I made of the different flavors in a Firestone Walker Russian Imperial Stout. If you are interested in further beer creations using this

beer, let me know. I also made a mixed drink using this beer which is shown
