## SketchUpPro2018v21016980PluginsPackrar

[less] A: Finally I managed to find this way to install plugins: First we should download the sketchup plugins in this website: [here](#) Then we should extract them in C:\Program Files (x86)\Autodesk\SketchUp Now we should open the C:\Program Files (x86)\Autodesk\SketchUp\Installation folder. Inside the Installation folder we should have sub folder 'Plugins'. The plugins folder should be empty or at least plugin should be in this folder. The plugin we downloaded should be in this folder. A: This is a backup from my 3DS Max 10.1 all the plugins I used in my 3DS Max 10.1. Just cut & paste this file into your plugin folder. 0ad\_3dsMax\_Plugins.zip Note: There is a folder named "Plugin". Inside the "Plugin" folder there are two directory named "Package" and "Plugin" Plugin is where your plugin is located, but some plugins may be having a sub folder like "Package" or "Plugin". Inside the "Plugin" directory 0ad\_3dsMax\_Plugins A: I would recommend you the SketchUp Pro 2018 Plugins Package. It contains most of the SketchUp plug-ins you need for any reason. It is free and easy to install. It has less pain than installing all the plugins one by one. Q: How to efficiently search and replace text with case-insensitive regex? I have a large string. I want to replace all occurrences of a pattern say "pattern" with "replace". I don't want to replace all of them with the same "replace". I want to do this: If the input string contains "pattern" as a word, replace it with "replace". If the input string contains "PATTERN" as a word, replace it with "REPLACE". If the input string contains "pattern" anywhere else in it, don't replace. Here is the thing I have tried: var inputStr = "Some text pattern 123 Some more text pattern 432 Text pattern with pattern words"; inputStr.replace(new RegExp("pattern","gi"), "replace"); If I try this, it doesn't work. edd6d56e20
