This is the first time I am trying to use capybara and I have a really hard time to figure out how to make this work. The following is the message that I get from the cucumber: capybara (3.0.0) lib/capybara/session\_binder.rb:155:in `session\_for': undefined method `session\_for' for Capybara::SessionBinder:Class (NoMethodError) The following is the code in the env.rb file: Capybara.app\_host = "" Capybara.run\_server = false Capybara.default\_driver = :selenium Capybara.javascript\_driver = :selenium Capybara::Selenium::Driver.app\_host = " 3da54e8ca3"
