What's New In Chord Scale Generator?

Chord Scale Generator (CSG) for guitar is an interactive song or chord guitar editor and chord scroller. CSG generates chords and plays them in a chord chart with colored fretboard. It can be used to practice chords and scales with a guitar, bass, ukulele, banjo, mandolin or other stringed instruments. When you select a chord or scale on the interactive guitar screen, CSG will automatically build a chord chart and play it. Keyboard Based Mode (KB) Chord Scale Generator (CSG) for guitar lets you practice chords and scales on your guitar without going through a keyboard. When you select a chord on the interactive guitar screen, CSG builds a chord chart and plays it in the same way as a computer keyboard. In addition, when you press a chord, a keyboard key number will be generated for each chord. This means you can practice chords on your guitar without needing a keyboard. X / Y Chord Scale Graph CSG has an X / Y Chord Scale Graph that shows you the structure of any chord on the interactive guitar screen. As soon as you select a chord on the guitar screen, the Chord Scale Graph starts showing the chord. The chord name is displayed in the vertical axis and the key number is displayed in the horizontal axis. The longer the chord name, the more notes are contained in the chord and vice versa. When you select a chord, it is automatically placed in the chord chart area of the X / Y Chord Scale Graph.
