Two years ago I wrote a book about how to start a business. It's called "How To Start A Business". And I think it's going to be worth a look, particularly if you are coming up the freelancing-tech-entrepreneur ladders... I came across this blog and these examples that are in the first three pages really caught my eye.

And why not... First. I think that the term "web 2.0" is very misleading, if you think about how it's being used. I agree that it's rapidly changing, but I would think that the paradigm of it being about sharing, online interaction, interoperability, user-generated content... all of those sorts of things are really, really old ideas. And the idea of "naked content" is a real, old idea.

What is behind the business of blogs and sharing content on social networks? Well first, I think, we have the blogs. And I don't mean this in a derogatory sense. Blogs actually started out to share information and it's a really good way of doing that. But it's also really telling when a lot of these social media and microblogging sites have an underlying business model that's based upon revenue through advertising. And the big drawback of advertising is that it's a much less efficient way of gathering information than in blogs. But when you think about it, that's the way we're actually collecting information these days anyway, we're just doing it in a different way. Even if you're using FriendFeed or you're reading the tech blogs, I'd be very surprised if the information didn't come from a publisher and the publisher is making revenue from a publisher web site.

The real "2.0" part of web 2.0 has to do with the fact that 2.0 was really about making information accessible, not about the way in which you access information. When I was at university I read *The Mythical Man Month*, and it really struck me. It's a book about how the organization of an organization can make a difference between success and failure. And it really did resonate. If you are an individual or organization, you start to realize that you are part of a whole, you are part of something, you're part of a

About Tarnished!:

A fantasy action adventure RPG where the edge of sanity wraps you in a thrilling adventure - A high-speed action game, where nonstop excitement is yours to enjoy.

The game was launched on November 2016. On the same day, it ranked first in visibility on Google Play (Web) - This is the highest rating that a new release receives, even overseas!

The Destination:

A fantasy action adventure RPG where the edge of sanity wraps you in a thrilling adventure, where nonstop excitement is yours to enjoy, that begins in the Lands Between - an interface world created in order to free the Lands Between, a world overflowing with adventure.

The Lands Between are a place where dreams and nightmares are not painted on a screen, but are actually in the real world. Elves, who worship the void and satan, are in control of the Lands Between. Evil and sinners, who break all of the laws, live here, and it turns out that they are sought after.

Players assume the role of Tarnished, who has gained power and is on his way to the Lands Between as an adventurer-at-large in search of adventure. This, however, is also the story of how Tarnished came to be in the Lands Between, as well as a story of the rise of the characters that surround him.

From the beginning, the game presents a mission to rescue one of

the people in the Lands Between, who is chased by an evil organization called "Sion." However, the adventurers are chased by "The Elden Knight" organization, too. Something is about to happen-It's not quite clear to what, but it's definitely something unexpected. It won't be easy for Tarnished and his company to
