Eden Ring is the latest tactical RPG (to come to PC) created by the hacker himself and the most popular modder Blackbade1. After having viewed the game and found out a good many flaws contained within it, Blackbade1 decided that the game wouldn't be released in such a state. Thus, after collecting all data pertaining to the game (save-files, functions, abilities) and having learned all of the flaws contained within the game, he has decided to create an environment that didn't let said flaws become corrupted.

Eden Ring doesn't contain any bugs or glitches or errors or any known exploits within its code. Everything, with the exception of its ending, the battle system & the dungeons, is bug-free. Hopefully none of these bugs will become corrupted since there's none left.

Love action RPG? Then the saga of the fearless Tarnished is ended.

Mod note: The gameplay of the mod, to a certain extent, has been influenced by the DarkArms mod for The Secret World. Feel free to check it out.

System Requirements For Elden Ring:

*Requires the latest version of Adobe Flash Player ----- Firmware 3.60 - 21.10.2010
