When working on games using Windows & Mac, an optimal workflow is to use

Visual Studio 2017 and Visual Studio for Mac. Visual Studio 2017 requires .NET Framework 4.7.1 or higher and Visual Studio for Mac requires OS X 10.12.6 or higher. We recommend that all teams work together to deploy updates to our DLLs in single merged source code. Manifest support is available in Visual Studio 2017. Here is a skeleton manifest for a default project.
