The disease resistance of Armenian cv Top Grade to cauliflower mosaic virus (CaMV) was investigated in comparison with common varieties (Maradon, Crol, Topax, Brilliant, and Mirabella). The results showed that the cv Top Grade is completely resistant to the CaMV infection throughout the growing season and the yield of this variety is not affected by CaMV. The topmost leaves are not alfalfa mosaic virus (AMV) susceptible and escape symptoms. Moreover, the cv Top Grade is snow-white cauliflower and therefore have a more marketable quality than the common white-flowered varieties. It affects people with gluten sensitivity to varying degrees. It is fairly common--about 1% of the population is sensitive. My doctor puts the prevalence at 0.7% for the relatively affluent and educated, but my husband's estimate is 7-10% (assuming they are all in fact sensitive to gluten--a big "IF"). A child with celiac cannot drink milk when the mother is breastfeeding. He or

An ocean of twisted science fills the air around a primitive village a few miles north of Boston, Massachusetts in the early 20th century. Objects from all over the globe which had been beached or washed upon the shores of the area, with names like "Fractal Mosaic" and "Carbonated Teapot" were unearthed and dubbed by a local newspaper "hush hush", despite the fact that they were quickly introduced and brought to public attention. The village itself had the feel of a cult - of madness; of dark energies and beliefs as strong as myth, as suffocating as the old ways, but with the benefits of modern scientific methods. This is a collection of three demo tracks from "Young Lovecraftian Adventures: The Thing From the Deep" by Travis Boone, Moddjobbs, and Will Roget II, dedicated to the twisted musics of the Lovecraftian universe and the way it's expressed throughout the fields of modern music. Moddjobbs and Travis Boone are making their first game, and working on live music for fans and backers of this cause! You can help support us by preordering "The Thing From The Deep". From a third-party, Oleg Blake founded a production company that would create a series of games using a minimalist real-time game engine. Playing around with the engine, he came up with a vision for a game that was similar to real life, that relied on pure muscle memory. This approach led him to the creation of Wide Open. "Wide Open" is a racing game, in which drivers compete in a large variety of vehicles on tracks that are completely deformable. In these types of games, timing is everything, and you need to be able to react to the condition of the track at the same speed as your competitors. This is why the game only relies on the standard WASD input keys and no additional controllers. Unsurprisingly, not everyone was a fan of Wide Open's look. The HUD looked rather plain, the camera rather limiting, and the bike's handling was at times a bit sluggish. But perhaps this was an attempt to give the game a feeling of authenticity. The sound and music were decent, but could have been a lot better. Nevertheless, the concept is awesome, and if the game is successful, it will lead to more such games. Play it here and

What's new:

01 Match Match Saga featuring more, larger and more interactive levels than the base game. Create and edit up to 9 of your own levels for unlimited replayability! The goal of the Match Match Saga (MM Saga) is to make 7 smaller marble targets fall into the larger marble or replica ball. Pick up all of these smaller balls before they reach the end and fill the main goal. As the levels progress, more goals will be given to fall upon and the moving marble will keep resetting. Make the hardest decision-which is harder: to make your new level or to keep playing in Match Match Saga? Match Match Saga Mission Control allows you to set up the controls to your heart's desire. Play on and play off as a human or with a human (unlocked for your free copy of the base game). Complete a level for a gamer rating and watch your grubber grow! Have us play the game with you or as your pal at www.paradisejoy.com/soundgrouper

Match Match Saga is a wonderfully creative and atmospheric Match Up sequel. Be sure to check it out, enjoy the music, and watch the grubbers squeal as you pull off masterful combos!

Game play Characters Starting with Match Match Saga, a wide selection of upgrades are available for the player's character.

Dust Lance - A finishing move that propels the player's character back toward the enemy. Also grants 1-up. Available to SH (current available upgrades unknown). Jiggy - Can clear all objects in sight (most other upgrades are limited to clearing visible objects). Available to SZ and SH (current available upgrades unknown). Grubber - The player's eyes, mouth, ears, etc. Look at the statistics to see the percentage of upgrades.

Missile Option - Players have the option of engaging the enemy in a firefight or just dashing in for the kill. Available to SH and SZ (current available upgrades unknown). Power Up - Available to all three characters. Complete the given tasks to unlock an upgrade. The update also added selectable character avatars. Since the vehicles in MM Saga are playable by the player, it is suggested that the player temporarily change the avatar of their vehicle to the desired character's avatar. To change the avatar, tap the "VAR" button. Special Abilities The player is able to designate one character to act as the

Welcome to the adventures of Cueca Listrada. This game is an independent production using asset CC0 1.0, CC BY 3.0 and some resources provided by the Engine. All characters were modeled using their own tools for creating characters or purchased from the Epic Games marketplace. The story of the game was inspired by the imagination we have during childhood, where small challenges become great achievements, using a character based on a real-life child. The final objective is for the striped underwear to be able to enter the circus to reach the exit of the stage, but for that he will need to go through four maps with keys hidden in the site and in the stage of the rocks on the beach and by several enemies. Thank you for contributing and participating in the project for the first version of the game. Sincerely, Carlos Martins - Blue Crab ● Management Dear gamers, We are very happy to publish the first version of the Adventures of Cueca Listrada game. In this work we have a real child, the character of Cueca (played by Carlos Martins), and a set of challenges to overcome to reach the final objective: enter the circus (scene 2) to leave the stage. Please remember that we can not help you with contacting the game creator to get the final version, since it belongs to him. Sincerely, Carlos Martins - Blue Crab ● Management Team Carlos Martins - Blue Crab Pernilla Lozano - Artist José António Ribeiro - Concept Designer Philip Winter - Game Designer Karol Podgórski - Game Programmer Rui Gaspar - Sound Designer ● About Blue Crab The Blue Crab team is a game studio located in Portugal, created by Carlos Martins, and has an international team of professionals with experience in the games industry.
