As a part of its recent development direction of FIFA, Konami also launched an online fan competition, inviting players to apply for a shot at becoming the face of Fifa 22 Serial Key. Today, the winner of the competition has been revealed, with new character artist Alex Fong being honoured to be chosen as the game's main character artist. First of all, thanks to all who voted! Secondly, I'm going to introduce myself: My name is Alex, and I'm the head of character design at KONAMI. I've been a part of the FIFA team for eight years, including time as a character designer, animator and motion capture actor. From the onset of my FIFA career, my main objective was to create characters with an edge. In particular, I wanted to bring awareness to FIFA characters through their animation. There was an increase in the use of characters in FIFA 19, but I've never been satisfied with past FIFA characters. To an extent, I feel that I've seen it all now. Therefore, I sought to create characters that would be alive and have personalities. Characters that move with a purpose, not just act like functional robots. There is such a thing as overdoing it, but I also think the opposite: When you apply realistic physics in an anime-style world, there's a limit to how similar the animation can get. As a result, I've been adding new things like the three-dimensional dynamics of the body and muscles, which give me a lot of pleasure to add to FIFA. My love for the small details in sports games is also something that has influenced my development of characters. I was able to experience the process of an athlete doing their warm-up exercises. When we were creating the character Mr. Lomax, a Spanish midfielder, we even included his individual warm-up routine. If you see it, you'll get a sense of the amount of care and love we put into our development. I think that what makes a character in a game stand out is its emotional range. I think that's the most important thing in the world of characters. When it comes to my FIFA career, I try to put more into the characters I create. I think this is one of the most exciting parts of this job.
