Here is how HyperMotion Technology will work: Players will come out of the tunnel and walk straight upfield before changing direction sharply on the halfway line or, if they are playing for a team on the right, into the goal mouth. The goal line will determine where the player is moving with a curve or a straight line. Players will perform one-on-one open play drills, short passes, possession and crosses, and head to head duels to provide clear simulation of the most intense football match action on all surfaces. In any football match, players are constantly in motion and interacting with each other. The real-life data from the High Intensity Player Motion system used in the match is what is used to determine the actions in a game. The full match footage is then used to compliment the physical conditions of the pitch. Players will react and look more like they do in real life, using muscle memory in every instance. FIFA 22 HyperMotion Technology provides a level of realism that was not previously possible when preparing for a match. Teams are able to recreate all of the challenges they experience during a match, whether it's adjusting tactics, understanding a new formation or the unique demands of a new surface. HOW HyperMotion TECHNOLOGY WORKS: 1) Early in the game, players will choose a primary formation. Each match will be played in a different formation, and will be playable in a variety of formations. Players can choose between a 4-3-3 or a 4-2-2-1 formation. 2) The touch screen on the player controls, as well as the 360 Camera, are used to help players understand their role on the pitch, and an icon of the player's captain will be displayed at the top of the screen. Players will have a 1x1 or an 1x2 mentality. Players can either play through the midfield or stay up front. The role on the pitch will be decided based on the formation they select at game start. 3) The pitch and gameplay will be rendered in 3D, and players will interact with other players and with the ball using the controller. 4) When the ball is in possession, players will have a 3D view of the pitch and other players. The 360 Camera can be used at any point in the game to scout for danger zones, mark certain players or check out other options on the pitch, such as free kicks, corners, and

The most authentic, extensive and realistic football club experience ever offers real-life team transfers, managing and building a squad from scratch and engaging in an action-packed weekly transfer market. MyClub - Create, train and manage your very own player from his pre-game preparation through to his post-game celebrations. Customise his skills on the pitch and take him into battles in a series of solo and co-op modes, including online multiplayer. Online Seasons - Play, compete, and test your best with up to 10 of your friends and compete in a Season of matches. Play with real players and clubs, in real locations. Compete in free online broadcasts, and celebrate in offline cups for your club. PES 2018 Focus Sessions - A whole new generation of FIFA, PES and Adidas football titles are coming to PlayStation in June 2018. Check out the Focus Sessions to see how the brand new FIFA and PES can excel on PlayStation. MY CLUB To start, players start at the bottom at the bottom where they can begin to manage a club, however, you can grow it from the local junior teams to the big football league. Then you can try to win in the Championship or promotion to the highest division. You can rise up the divisions to challenge for the Champions League or be content to raise the club to a respectable position and knock on the door of the Europa League or even FA Cup (and so on, for those lucky enough to feature in one of those). You can go all in in the end and try to win the Champions League, and accept that most clubs do not have the budget to compete for the biggest competition. PLAYERS You can create new players or search through the Xbox Live player database to pick the most suitable. Each player has stats that show their abilities, appearance, and weakness, so you can easily make sure your players don't get outmuscled, get injured, or develop bad habits. The most important statistic is the shooting rating. This shows if the player is capable of taking shots on goal and the expected shooting accuracy. It also will show if your player can score goals. You can buy and sell players as you see fit, but be careful to not be too low in the transfer budget. This will give your players a bad name and your club will become unpopular. You can have up to 3 players in your starting XI at a time, which will be determined using the My Club screen.
