Legacy GPU Driver for Intel HD Graphics, ATi Radeon HD 5650. Download the Latest Intel® GM1 I/O DRIVER. GRAPHICS FOR COMPAQ LAPTOP. Golf clubs are used by individuals for recreation and for competition. Particularly for competitive purposes, the length of a golfer's drive is often of considerable interest. In order to determine the distance a golfer has driven an iron, a penalty ball is set in the ground at the location where the shot was taken. Upon striking the penalty ball, the golfer retrieves the hit penalty ball, measures the distance from the penalty ball to the golf ball, and multiplies the two distances together to determine the amount of yardage driven by the golfer. In the past, golfers have used different measuring devices for determining the distance from the penalty ball to the golf ball. One such measuring device has been a protractor which is held up by the golfer, or is otherwise manually held at the golfer's side, such that the golfer may measure the shot distance. A range finder or range estimator is a measuring device which is carried by the golfer and which electronically determines the distance to the object the golfer is aiming at. See for example U.S. Pat. Nos. 4,556,928 and 4,829,839 to Landry et al. The Landry patents describe a range finder which allows a golfer to measure the distance to a golf ball from the golfer's position by observing a small dot on the golf ball which appears to move in accordance with the movement of the golfer's eye, and which displays the distance to the ball on a digital display. Other range finders include those described in U.S. Pat. Nos. 5,337,156 to Braun et al. and 5,396,435 to Peterson et al. A benefit of a golf rangefinder is that if the distance to the golf ball is determined and displayed for future reference and comparison, then a golfer may practice his game and shoot for the goal he would like to hit the ball for. Also, a rangefinder provides a golfer with a means to mentally gauge the distance he has hit a golf ball. However, there is a common drawback with all golf rangefinders, and that is that the user must physically carry the golf rangefinder. In certain circumstances it is highly undesirable to physically carry a golf rangefinder. For example, if a golfer is
