What's New In?

Arclab Thumb Studio is an easy to use image gallery, thumbnail, slideshow and web photo album creator for everyone. Its also an image converter, which allows you to create 3 different image sizes at once, convert them to a different format or add a watermark. The program not only contains several drafts, which could be customized, it also allows you to integrate the album or slideshow directly into your existing htmlpage. This is very easy - all you have to do is to select the position in your webpage and the program does the rest. It allows a seemless integration, were you can define exactly how it should look like. All attributes can be customized: image size, rows, columns, color, fonts, spacing, width, buttons. It can also be used to add a visible watermark to your images. The watermark can be an image with an alpha-channel (layer) for true transparency, that you can adjust at different levels and lets you define attributes like size, opactiy and spacing. Thumb Studio includes EXIF support to read information like blend, apperture. from your digital images. It also allows to add metatag informatons like IPTC/JPEG comments for copyright notices or image descriptions. Thumb Studio will not require you to sign up for any photo-sharing service. You can upload the images to your own webserver/webspace or use it as off-line album. (HTML output) Note: Free for private use. Software Requirements: You do not need any special configuration of your server. Only to have installed a basic LAMP (Linux + MySQL + Apache) environment. (Linux and Apache is pre-installed) Community support: Buy a premium to download file with fast speedthanksRapidgator.net Free for private use.. You do not need any special configuration of your server. Only to have installed a basic LAMP (Linux + MySQL + Apache) environment. (Linux and Apache is pre-installed) Community support:
