KeyMacro is an easy-to-use keyboard macro software that lets you create keystrokes and mouse clicks using the mouse or keyboard. This program enables you to enter a list of keystrokes and mouse clicks or buttons. Then, you can easily assign them to a shortcut key, a mouse button or a combination of the two. KeyMacro includes

several features that help you make the most of this application. You may create new macros using the keyboard or drag and drop the macros that you want to copy to the keyboard or edit the ones you already have. Furthermore, you can easily modify the priority and functionality of each macro. Also, you can assign the buttons of the frame, as well as the mouse buttons, to macros. The settings window lets you create new macros with just a few clicks. Additionally, you can use the KeyMacro preferences to modify

existing macros. The program lets you save macros in two formats: Plain and EXE. The EXE format is a compressed one, which means that you need to install it in order to make it run. After installing KeyMacro, you may find that it will automatically launch after each restart of the operating system. Also, the program runs without the need to install any driver. KEYMACRO

## Active DJ Studio

Active DJ Studio is an audio and video playback application that also supports CD burning. It was developed to make your life easier. The main features of this software are its ability to play a wide variety of media files, playlists and CDs. The program's powerful engine lets you do a lot of things. You can, for instance, control all of the audio and video devices connected to your computer. All you have to do is specify the desired one and select it. You can

mix audio files, add audio effects, create playlists, burn CDs, create slideshows, cut audio and video files, transfer files, run your system diagnostics and view the system properties. You can also use Active DJ Studio to find out more information regarding audio and video files, such as the duration, the name of the artist, the album, the genre and so on. Another nice thing about this program is that you can assign one or more media files to play together in a group. This is done by right-clicking on the playlist and

selecting Playlist > Play As Group. Active DJ Studio comes with an additional feature called Active DJ Studio DJ, which lets you create, edit and play your playlists. In addition, you can customize the output via the Component Selector, which lets you select between analog and digital outputs, such as RCA and 3.5mm jacks, and between CD/SACD and digital outputs, such as S/PDIF and Toslink. You can also add cue points, time stamps, shift time, set repeat and play a video file automatically. You may play

your created playlists on your computer, tablet, mobile phone or anywhere else with the help of an output device. Active DJ Studio also allows you to view the media file's tempo and sample rate. You can alter these parameters by right-clicking on the player and selecting Settings > Sample Rate and Tempo.

Features: Convert AIFF and FLAC files to MP3 and other formats. Automatic extraction of information from your media files. Cut audio and video files from the source. Burn audio CDs. Support for MP3, MP2,

MP4, AAC, WAV, OGG, AIFF, WMA, WMV, ASF, AC3, M4A, FLAC and CDA file formats. Playlists and MP3 files. Create your own playlists, and manipulate playlists.
