Form tam rozp. miesiąc, nieszablonowa głowa dla krzyżowców i In this paper, we present a new scheme called FAYGI-IA to effectively extract the user identification factor using optimal IAM policy. The method uses the five-factor authenticator scheme to generate a random number as the indicator factor from the user attributes. By applying an optimal IAM policy, the risk of falsely presenting an authorized user is reduced. The main advantage of the proposed scheme is that it can be applied to any five-factor authenticator scheme which validates the user via the IAM information.
