An Adorable Kitty Nail Polish - Brighton Fuchsia I spent about two hours yesterday doing one coat of this polish on my nails. It's not even fully dried and it's coming off. I'm having a hard time looking at it in the mirror. I hate the idea of it sitting on my nails. It's supposed to be an opaque pink. I don't know if I'll ever use it again. :/ *I don't purchase products from drugstores, but I bought this off the drugstore counter. I may have been looking at it for the longest time before I just decided to go for it. :P Influence of surface processing on bond strength of resin composites to metals. The aim of this study was to determine the bond strength of flowable resin composites, compared with conventional resin composites, to three different types of high noble metals, under 2 different surface treatments. Four different surfaces were prepared for each metal; acid etched (A), sandblasted (B), sandblasted and acid etched (SB), and sandblasted and etched for 120 seconds (20% HCl) (SE). The tested flowable composites were Starbase Flow (SB) and Cristobalite Flow (CF). The tensile bond strength was tested after 24 hours of storage in water at 37 degrees C. The mean bond strength value
